Clear Sky Hotel

Our hotel was built in 2018 with using newest building technologies.

Clear Sky is not just a hotel, it's also a swimming pool complex, supermarkets, cinemas and much more. Building situated near "Moon Beach" — it allows to see so picturesque view of all beauty of West Coast. Our mission is creating most comfortable and suitable service for everyone, by that reason our hotel got so many different rewards.

My first day in a hotel was amazing. Beauty of the haul were absolutely mindblowing. My room situated on the 27 layer. I get up here using very comfortable and spacious lift. I was evening so when I've opened the door I saw beautiful red sunset. On the first layer situated "Sweden table" which works 24/7, you can take everything. Dishes here are awesome: lobsters, squids, different types of caviar and much more. Waiters here knows about 30+ different languages including Russian and even Chinese.

As I suppose every one understand that this hotel is perfect, but how much it cost per night? Without "Sweden Table" it costs 2500 dollars per night, with 3250 dollars. Only in this hotel sleeps Presidents, Ministers, businessmen and people like Elon Musk. Only thing what this hotel wants from you is money, but then it gives to you all spectre of pleasant feelings.
