Writing

As I am consider, holidays are very important part of ~~the~~ students' lives. Because in that time they can spend their time with friends, attend their relatives and so on.

In my opinion, to spend my holiday at home is so attractive idea. I can spend my time with my family, watch ~~diff~~er variety films, read exciting books, to learn something new. And just I want to be alone. Anyway, it sounds so good to stay there and enjoy the moment, I like this idea.

But the other hand, to spend all the time of my holiday at home seems so boring and terrible. I can not hang out with my friends, go shopping, visit cinema. Also, I can not travel another city or country. I suppose that is so interesting. I am able to meet with new people and other exciting stuff.

In conclusion, I would like to say, that each man chooses how to spend his holiday by his own. Somebody loves stay at home, sleep, to have a talk with his family and do nothing. And other people love and enjoy active holiday. To visit new places to find out culture of this country and meet with traditions, also attend new modern hotels. As for me, I would like to stay at home. This is the best for me. I adore it and can do this all time. So, Let it choose his holiday by his soul.
